

Product Code

DM-A22550.08

Features:

- Heavy duty cable tray - standard straight low cost Heavy weight cable tray.
- The purpose of using the fish plate is to create a flat surface
- The purpose of using the fish plate is to create a flat floor by preventing the bends that may occur at the end joints of the cable trays as a result of loading.
- It can be produced in required thickness from 0.80mm to 2.00mm.

Description

DM-A22550.08

Heavy duty cable tray (A)
for 50mm height

Width (w)

Height (h)

Thickness (t)

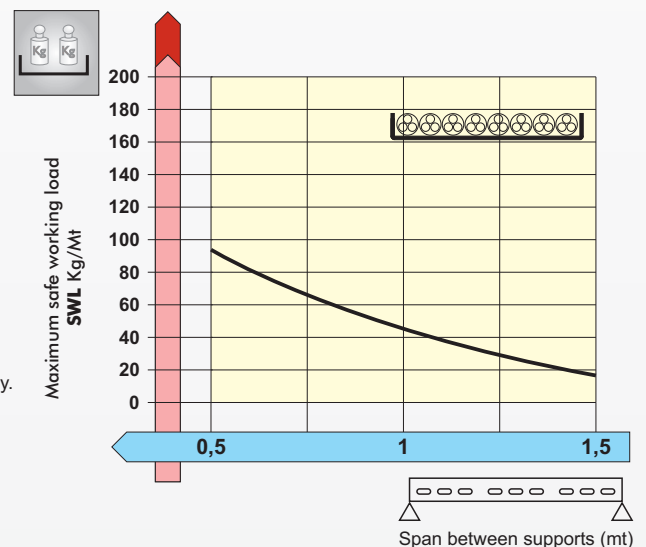

Dimensions

Width (w) : 225
Length (L) : 3000
Thickness (t) : 0,8
Height (h) : 50

- Dimensions are in millimetres
- The dimensions of all holes on the cable tray are 8.5X20mm

Load Capacity

- The greater the distance between supports, the lower their carrying capacity.
- The carrying capacity can be increased as the cable tray thickness increases.
- Suspension and support products are determined according to the carrying capacity. As the cable density increases, the suspension and support distance decreases, the number of hangers and supports can be increased.
- Fasteners (dowels, rods, etc.), which are auxiliary materials used in fixing the hangers and supports, are determined according to the increase in carrying capacity.

Carrying capacities of cable trays are tested without including their own weights.

Coating

PG Pre-Galvanised Steel

HDG Hot - Dip Galvanised Steel

BS EN 61537

EPC Electrostatic Powder Coating

SS Stainless Steel
