

DATASHEET

Metal Trunking 50x100x50

Features:

Cable trunking is a system used to organize and protect electrical cables or wires in buildings or industrial settings.

It provides a safe and tidy way to route and conceal cables, improving the overall appearance and safety of the installation.

In our facilities, cable ducts consist of a metal, rectangular or square-shaped casing.

The enclosure has a removable or hinged cover, allowing easy access to the cables when necessary.

The trunking is designed with various compartments or channels to accommodate multiple cables of different types and sizes.

Description:

Order Code

DM-T10050.10

Thickness (t) 1,00mm
Height (h) 50mm
Width (w) 100mm

Trunking Order Code

DM : Dual Metal

T: Trunking

Dimensions

Width (w) : 100

Thickness (t) : 1,00

Height (h) : 50

•Dimensions are in millimetres

•The dimensions of all holes on the trunkings are 6,00mm

Coating:

PG Pre-Galvanised Steel

HDG Hot - Dip Galvanised Steel

EPC Electrostatic Powder Coating

SS Stainless Steel

Attention

After the cables are placed, the cover is closed and the bolt on it is locked with a screwdriver.
