DATASHEET

T BEND FOR MEDIUM DUTY CABLE TRAY W300 H25

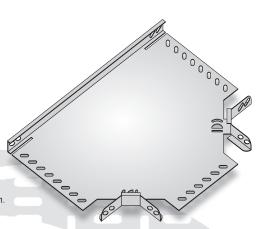

FEATURES:

- Flat 90 degree bend have two width dimensions and are produced equally.
- There are holes in the flat 90 degree bend base.
 The cable tray is fixed with M8x15 bolts and nuts to coincide with these holes.
- Width dimensions can be produced differently.
- Example: In special productions, the dimensions must be clearly specified. It can be produced as X:300mm, Y:150mm, the size expression should be 300/150 when defining the product.

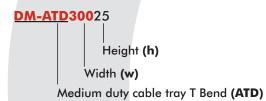

These products cannot be changed and returned as they will remain fixed after production. In special productions, the code is specified according to the larger size.

• It can be produced in required thickness from 0.80mm to 2.00mm.
